PROFESSIONAL SUMMARY

Senior Consultant specialized in operational excellence and business transformation, helping organizations redesign business processes and improve performance through data, technology and Artificial Intelligence.

My experience spans the full transformation lifecycle, from process discovery and operating model redesign to AI implementation and business rollout. Combining Industrial Engineering with AI software development, I bridge business strategy and innovative technology.

PROFESSIONAL EXPERIENCE

PwC <i>Senior Consultant – Operations & Supply Chain</i>	Dec. 2024 – Present <i>Promoted in June 2026</i>
• Leading Spanish Fashion Retailer — Back-Office AI Transformation – Owned the end-to-end delivery of two AI transformation initiatives, from process discovery and solution design through deployment. – Led the rollout of an agentic AI workflow for shipment documentation management, processing more than 60,000 documents annually and reducing operational workload by 1.5 FTE. – Leading the delivery of an AI solution to automate customer missing refund investigations. • Leading Spanish Facility Services Company — Operational Transformation Supported a company-wide operational excellence programme focused on procurement optimization and operational efficiency improvements. – Redesigned the maintenance procurement model, reducing procurement expenditure by approximately 20%. – Assessed and tracked more than 100 operational improvement initiatives, representing potential annual savings above €8M. – Designed and deployed a fleet analytics control tower, providing visibility into fleet utilization and operational performance.
